- Strong water jet.

**5.2 Special hazards arising from the substance or mixture**

Formation of toxic gases is possible during heating or in case of fire.

**5.3 Advice for firefighters**

Wear a self-contained breathing apparatus and chemical protective clothing.

**Additional information**

- Do not inhale vapors and fumes.
- Co-ordinate fire-fighting measures to the fire surroundings.
- Move undamaged containers from immediate hazard area if it can be done safely.
- Use caution when applying carbon dioxide in confined spaces. carbon dioxide can displace oxygen.
- Use water spray jet to protect personnel and to cool endangered containers.
- Collect contaminated fire extinguishing water separately. Do not allow entering drains or surface water.

<b>section</b>	6	Accidental release measures
----------------	---	-----------------------------

**6.1 Personal precautions, protective equipment and emergency procedures**

- Avoid any direct discharge into the sewer, surface water, and groundwater.
- Ensure that waste is collected and contained.
- In case of gas escape or of entry into waterways, soil or drains, inform the responsible authorities.
- Avoid release to the environment.
- Cover drains.
- Ensure all waste water is collected and treated via a waste water treatment plant.

Do not allow to enter into soil/subsoil.  
 Do not allow to enter into surface water or drains.  
 Retain contaminated washing water and dispose it.  
 Contain leaks or spills within cabinets with removable trays.

**6.3 Methods and material for containment and cleaning up**

Absorb material with inert absorbent powders or granules (sand...).  
 Significant overflows must be absorbed by sand or an inert powder, then disposed of according to current regulations.  
 Clean the powder with a vacuum cleaner. Wash with water and detergent.  
 If rags are used for wiping, dispose of them quickly by incineration, as cases of self-oxidation with spontaneous combustion are known.  
 Wash with water and detergent.  
 Elimination of gas/smoke by water spraying.  
 Treat the recovered material as prescribed in the section on waste disposal.  
 Collect in closed and suitable containers for disposal.  
 Clean contaminated objects and areas thoroughly observing environmental regulations.  
 Collect spillage.  
 Absorb with liquid-binding material ( e.g. sand, diatomaceous earth, acid- or universal binding agents).  
 Wipe up with absorbent material (eg. cloth, fleece).

**Handling and Storage**

**7.1 Precautions for safe handling**

**PROTECTIVE MEASURES:**

Avoid contact with skin, eyes and clothes.  
 Wear personal protective clothing (see section 8).  
 Sewers and ducts must be protected against the entry of the product.  
 Do not put any product-impregnated cleaning rags into your trouser pockets.  
 Provide for retaining containers, eg. floor pan without outflow.  
 Use only in well-ventilated areas.  
 If local exhaust ventilation is not possible or not enough, the entire work area must be ventilated by technical means.  
 Provide adequate ventilation as well as local exhaustion at critical locations.  
 Vapours/aerosols should be exhausted directly at the point of origin.  
 Avoid breathing gas/fumes/vapour/spray.

**Advices on general occupational hygiene:**

Wash hands before breaks and after work.  
 Wash contaminated clothing before reuse.  
 Street clothing should be stored separately from work clothing.  
 Remove contaminated, saturated clothing immediately.  
 Work in well ventilated zones or use proper respiratory protection.

**In the immediate working surroundings there must be:**

Provide eye shower and label its location conspicuously.

**7.2 Conditions for safe storage, including any incompatibilities**

Keep container tightly closed in a dry, cool, and well-ventilated place.  
 Keep container in upright position in order to prevent leakage.

**Requirements for storage rooms and vessels:**

Use isolated drainage to prevent discharge to soil.

Ensure adequate ventilation of the storage area.

Use gloves only once.

**Remark:**

When handling with chemical substances, protective gloves must be worn with the CE-label including the four control digits. The quality of the protective gloves resistant to chemicals must be chosen as a function of the specific working place concentration and quantity of hazardous substances. For special purposes, it is recommended to check the resistance to chemicals of the protective gloves mentioned above together with the supplier of these gloves. Breakthrough times and swelling properties of the material must be taken into consideration.

**Body protection:**

**Suitable respiratory protection apparatus:**  
 Wear respiratory protection.  
**Remark:**  
 The filter class must be suitable for the maximum contaminant concentration (gas/vapour/aerosol/particulates) that may arise when handling the product. If the concentration is exceeded, self-contained breathing apparatus must be used.  
 Observe the wear time limits as specified by the manufacturer.  
 Use only respiratory protection equipment with CE-symbol including four digit test number.
