Do not leave affected person unattended.

Remove victim out of the danger area.

Keep affected person warm, still and covered.

Remove the affected person from the danger zone and lay down.

##### **Following inhalation:**

Remove person to fresh air and keep comfortable for breathing.

##### **Following skin contact:**

Sand.

**Unsuitable extinguishing media:**

Strong water jet.

**5.2 Special hazards arising from the substance or mixture**

Formation of toxic gases is possible during heating or in case of fire.

**5.3 Advice for firefighters**

Wear a self-contained breathing apparatus and chemical protective clothing.

**Additional information**

Do not inhale vapors and fumes.

Co-ordinate fire-fighting measures to the fire surroundings.

Move undamaged containers from immediate hazard area if it can be done safely.

Use caution when applying carbon dioxide in confined spaces. carbon dioxide can displace oxygen.

Use water spray jet to protect personnel and to cool endangered containers.

Collect contaminated fire extinguishing water separately. Do not allow entering drains or surface water.

<b>section</b>	6	Accidental release measures
----------------	---	-----------------------------

**6.1 Personal precautions, protective equipment and emergency procedures**

Use personal protection equipment.

Remove persons to safety.

Provide adequate ventilation.

Use appropriate respiratory protection.

**6.2 Environmental precautions**

Ensure that waste is collected and contained.

In case of gas escape or of entry into waterways, soil or drains, inform the responsible authorities.

Avoid release to the environment.

Cover drains.

Ensure all waste water is collected and treated via a waste water treatment plant.

Do not allow to enter into soil/subsoil.

Do not allow to enter into surface water or drains.

Retain contaminated washing water and dispose it.

Contain leaks or spills within cabinets with removable trays.

**6.3 Methods and material for containment and cleaning up**

Treat the recovered material as prescribed in the section on waste disposal.  
 Collect in closed and suitable containers for disposal.  
 Clean contaminated objects and areas thoroughly observing environmental regulations.  
 Ventilate affected area.  
 Collect spillage.  
 Absorb with liquid-binding material ( e.g. sand, diatomaceous earth, acid- or universal binding agents).  
 Wipe up with absorbent material (eg. cloth, fleece).

section <b>7</b>	<b>Handling and Storage</b>
---------------------	-----------------------------

**7.1 Precautions for safe handling**

**PROTECTIVE MEASURES:**

Avoid contact with skin, eyes and clothes.  
 Remove fume condensates periodically from extraction hoods, leads and other surfaces (wear personal protective clothing!) as there is a risk of catching fire.  
 Use only in well-ventilated areas.  
 If local exhaust ventilation is not possible or not enough, the entire work area must be ventilated by technical means.  
 Keep away from sources of heat (e.g. hot surfaces), sparks and open flames.  
 Provide earthing of containers, equipment, pumps and ventilation facilities.  
 Take precautionary measures against static discharges.  
 Wear personal protective clothing (see section 8).  
 Sewers and ducts must be protected against the entry of the product.  
 Do not put any product-impregnated cleaning rags into your trouser pockets.  
 Provide for retaining containers, eg. floor pan without outflow.  
 Provide adequate ventilation as well as local exhaustion at critical locations.  
 Vapours/aerosols should be exhausted directly at the point of origin.  
 Avoid breathing gas/fumes/vapour/spray.

**Advices on general occupational hygiene:**

Wash hands before breaks and after work.  
 Remove contaminated, saturated clothing immediately.  
 Wash contaminated clothing before reuse.  
 Street clothing should be stored separately from work clothing.  
 Work in well ventilated zones or use proper respiratory protection.

**In the immediate working surroundings there must be:**

Provide eye shower and label its location conspicuously.

**7.2 Conditions for safe storage, including any incompatibilities**

Keep container tightly closed in a dry, cool, and well-ventilated place.  
 Keep container in upright position in order to prevent leakage.

**Requirements for storage rooms and vessels:**

Ensure adequate ventilation of the storage area.  
 Ground/bond container and receiving equipment.  
 Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.  
 Use isolated drainage to prevent discharge to soil.

**Advice on joint storage:**

Keep away from food, drink and animal feedingstuffs.  
 Keep away from clothing and other combustible materials.  
 Keep only in the original container in a cool, well-ventilated place, away from highly flammable substances.

**Further information on storage conditions:**

Use explosion-proof electrical/ventilating/lighting/.../equipment.  
Use only non-sparking tools.

**7.3 Specific end uses**

Apart from the uses mentioned in section 1.2 no other specific uses are stipulated.

section **8**

**Exposure controls/personal protection**

**8.1 Control parameters**

**8.2 Exposure controls**

**Appropriate engineering controls:**

Technical measures and the application of suitable work processes have priority over personal protection equipment. Provide adequate ventilation as well as local exhaust at critical locations.

**Individual protection measures, such as personal protective equipment:**

**Eye/face protection**

- : **Suitable eye protection:**  
Wear eye protection equipment.
- : **Recommended eye protection articles:**  
Eye glasses with side protection.

**Skin protection**

- : **Hand protection:**

Butyl caoutchouc (butyl rubber).  
**Additional hand protection measures:**  
Do not wear gloves near machines and rotating tools.  
Use gloves only once.
- Remark:**  
When handling with chemical substances, protective gloves must be worn with the CE-label including the four control digits.

The quality of the protective gloves resistant to chemicals must be chosen as a function of the specific working place concentration and quantity of hazardous substances.

For special purposes, it is recommended to check the resistance to chemicals of the protective gloves mentioned above together with the supplier of these gloves.

Breakthrough times and swelling properties of the material must be taken into consideration.

**Body protection:**

**Suitable protective clothing:**

Lab coat.

**Respiratory protection**

**Respiratory protection necessary at:**

If technical exhaust or ventilation measures are not possible or insufficient, respiratory protection must be worn.

**Suitable respiratory protection apparatus:**

Wear respiratory protection.

**Remark:**

The filter class must be suitable for the maximum contaminant concentration (gas/vapour/aerosol/particulates) that may arise when handling the product. If the concentration is exceeded, self-contained breathing apparatus must be used.

Observe the wear time limits as specified by the manufacturer.

Use only respiratory protection equipment with CE-symbol including four digit test number.
